MATHEMATICS DEPARTMENT

Hello RHHS Math students!

Thank you to all students who participated in the CIMC / CSMC contest in November. I have received the unofficial results of the contest and expect to get the official results, along with averages and cut off scores for distinction shortly. Please ask your math teacher for your score. If you are not taking math this semester, please email me at carmen.sinatra@yrdsb.ca to request your results.

I have had a lot of students asking me if I will be running other math contests this (school) year. Regretfully, due to numerous challenges with administering these contests under the current circumstances, I have come to the decision to not run the AMC, PCF (Pascal, Cayley, Fermat) or the FGH (Fryer, Galois, Hypatia) contests.

The University of Waterloo is still allowing students to register on their own, which I fully encourage you to do. Please use the following link:

<https://www.cemc.uwaterloo.ca/contests/registration.html> and click on “New Individual Registration”. Currently, the AMC is not offering individual registration for their contests.

I have left the door open to possibly run the Euclid contest, as I know it is important for many grade 12 students. The deadline for registration is March 18 and the contest date is April 8. I am hoping to have more information for senior students who wish to participate in this contest soon. Ask your math teacher for more information as the time gets closer.

Thank you all for your understanding. I look forward to a time when we can run our contests as usual!

Ms.C. Sinatra
