

P.22 #1

2.

(7)

$$\frac{x}{\sin 125^\circ} = \frac{10}{\sin 30^\circ}$$

$$x = \frac{10 \sin 125^\circ}{\sin 30^\circ}$$

$$x = 16.38$$

$$= 16.4$$

$$\therefore \underline{\underline{16.4 \text{ Km}}}$$
